* If you're wondering why we're using the **zzTAGzz** format instead of a standard hashtag: unfortunately, some email clients (looking at you, Outlook!) ignore punctuation in their search filters, which makes hashtags unreliable for our purposes.

** Another way to filter for the "From TDM" category is to set up a rule that applies to any emails that are sent to young-ogemid@ogeltdm.com from contact@transnational-dispute-management.com.
